WEED EASY
Non-Selective Herbicide For Controlling a Wide Range of Annual and Perennial Weeds and Grasses

ACTIVE INGREDIENTS: Bromacil (5-bromo-3-sec-butyl-4-methyluracil) ........ 4.00%
INERT INGREDIENTS: ........................................ 96.00%
TOTAL .................................................... 100.00%

FOR USE ON NON-CROPLAND AREAS SUCH AS FENCEROWS, STORAGE YARDS AND INDUSTRIAL AREAS

PO Box 240014 • Milwaukee, WI  53224

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. Do not enter or allow others to enter treated area until dusts have settled. This granular non-selective herbicide is used for controlling a wide range of annual and perennial weeds and grasses. Do not use in residential area. It is recommended only for non-cropland areas, such as railroad rights-of-ways and industrial areas. The application of 200 to 300 pounds of this product per acre usually results in a nonproductive condition for a period of a year or more. The duration of nonproductivity is dependent upon rain type, soil type and other conditions.

DIRECTORS
Apply product as furnished using a seed spreader, fertilizer spreader, shaker type applicator or any equipment which will distribute this product over the area to be treated.

To control annual and most perennial weeds and grasses, apply at a rate of 200 to 300 pounds per acre; on smaller plots use 1 lb. per 150 - 215 ft². Repeat spot treatment if necessary. Repetitive applications may be required when deep rooted perennial weeds are present. To obtain best results, apply to the ground where it will be absorbed by the roots. Applications early in the season have been found to give results superior to applications made later in the season. This product may, however, be applied at any time of the year. Maximum effectiveness in arid regions is obtained when application is made just prior to the rainy season.

Users should consult State Agricultural Experimental Stations or Extension Service Weed specialists for recommendations as to use of this product in their particular area.

IMPORTANT: Do not apply on or near valuable woody or herbaceous plants or in areas where their roots may extend, because of possible injury to such plants. Thoroughly clean spreading equipment with a suitable chemical cleaner before using for other purposes (or do not use same spreading equipment for other purposes).

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage and disposal.

Pesticide Storage: Store in a cool, dry area. Always store pesticides in the original container. Store away from food and pet food.

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray runoff, and washwater is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Pesticide Disposal Nonrefillable Container: Do not reuse or refill this container. Offer for recycling, if available.
