## Ultra-Self Bailer®

### Passively filter hydrocarbons from stormwater in outdoor containment products

Outdoor spill containment presents a challenge that is not seen indoors...rain. Unless outdoor spill containment is covered / protected from the elements, it is susceptible to rainfall. If a containment unit's sump gets filled up with rainwater, it loses its capacity to contain spills. In other words, for every gallon of rain in the sump, there is one less gallon of chemical / fuel / hazmat that can be contained.

The Ultra-Self Bailer is designed to attach to any spill containment unit, typically by a bulkhead fitting. Rainwater drains through the bulkhead fitting and any residual oil, gas or other hydrocarbons is removed by the filter media inside of the unit, allowing only clean water to exit. In the event of a spill, the media swells, completely sealing off the Self Bailer preventing any liquid from escaping.

## Ultra-Self Bailer

Part #	Model	Dimensions in. (mm)	Weight lbs. (kg)	Notes
9935	Standard	28 x 3.5 x 3.5 (711.2 x 88.9 x 88.9)	2 (.9)	6-28 oz. Capacity   Cut-off Loss:* 7
9937	L	36 x 4.5 x 4.5 (914.4 x 114.3 x 114.3)	6 (2.7)	21-28 oz. Capacity   Cut-off Loss:*
9926	XL	39 x 6.5 x 6.5 (990.6 x 165.1 x 165.1)	11 (5)	140-156 oz. Capacity   Cut-off Loss
9928	XXL	43 x 9 x 9 (1092.2 x 228.6 x 228.6)	16 (7.3)	200-226 oz. Capacity   Cut-off Loss

## Replacement Filters

Part #	Model
9936	Ultra-Self Bailer Replacement Filters - Standard
9938	Ultra-Self Bailer Replacement Filters - Large
9927	Ultra-Self Bailer Replacement Filters - XL
9929	Ultra-Self Bailer Replacement Filters - XXL

- The best protection for non-monitored containment sites.
- Helps eliminate problems associated with the collection of rainwater in outdoor containment products.
- Simple installation - can be connected to any outdoor containment product.
- Hydrocarbon "sheens" and modest spills are captured - clean stormwater drains through the outflow port.
- Larger or concentrated spills activate "auto-shutoff" mechanism.
- Manual shutoff valve can be used to secure all draining operations.
- Filters are quickly and easily replaced.
- PVC construction - will not rust or corrode.
